

Subcontractors to Joburg Roads Agency are currently widening the roads at the Marie Avenue and Sandton Drive intersection.

Marie Ave will be made wider on the west of the southern extension; and on either side of the northern extension against George Lea Park and the Total garage precinct to provide smoother curve into Sandton Drive.

An additional lane will be built on Sandton Drive north going toward Sandton CBD. The pallisade fence along George Lea Park has been taken down to allow the extension.

This construction is expected to take several months.
